GROW

PROGRAM OVERVIEW

This program is designed to help learners master Startup & Entrepreneurship through a structured, industry-aligned curriculum.

You will learn how to identify opportunities, validate ideas, build startup models, create brands, leverage AI tools, develop MVPs, and launch real-world ventures.

AT A GLANCE

DURATION

30–40 Hours
Comprehensive
Training

MODE

Hybrid
Interactive &
Project-Based

LEARNING APPROACH

Startup Building &
Practical Learning

FOCUS

Startup Building
in the AI Era

CERTIFICATION

Industry-Recognized
Certificate of
Completion

IDEAL FOR

Students, Founders,
Professionals &
Entrepreneurs

MEET AMBER

YOUR AI LEARNING COMPANION

Amber will guide you throughout the program—explaining startup concepts, sharing industry insights, suggesting modern tools, and helping you transform ideas into real ventures.

YOUR LEARNING JOURNEY

01 LEARN

Understand entrepreneurship, startups, and business fundamentals.

02 PRACTICE

Validate ideas through research and customer discovery.

03 BUILD

Create business models, brands, and MVP prototypes.

04 INNOVATE

Apply AI tools and modern startup frameworks.

05 SUCCEED

Launch ventures and present investor-ready pitches.

“ Learn. Build. Automate. Innovate.
Rise with AI.

AI & PROMPT ENGINEERING

INDUSTRIAL TRAINING PROGRAM

DURATION
30–40 Hours

MODE
Live
Instructor-Led

LEVEL
Beginner to
Intermediate

**PROJECT-BASED
LEARNING**

**PROGRAM
OBJECTIVE**

Learn how modern AI systems work, master prompt engineering techniques, build AI-powered workflows, automate repetitive tasks, and leverage Generative AI for business, development, marketing, research, and entrepreneurship.

01

Module 1: Foundations of Artificial Intelligence

 DURATION: 4 HOURS

1. Introduction to AI

- What is Artificial Intelligence?
- Evolution of AI
- Narrow AI vs General AI
- Machine Learning vs Deep Learning
- Generative AI vs Traditional AI

2. Modern AI Ecosystem

- Large Language Models (LLMs)
- Multimodal AI
- AI Agents
- AI Assistants
- AI Search Engines

3. Understanding Modern Models

Overview of:

- GPT Family
- Claude Family
- Gemini Family
- Llama Family
- DeepSeek Models
- Mistral Models

4. Practical Session

Compare outputs from multiple models on the same task.

02

Module 2: Understanding Large Language Models

 DURATION: 4 HOURS

1. How LLMs Work

- Tokens
- Context Windows
- Training Data
- Fine-Tuning
- Retrieval-Augmented Generation (RAG)

2. Strengths and Limitations

- Hallucinations
- Bias
- Context Loss
- Knowledge Cutoffs

3. AI Safety & Responsible Usage

- Ethical AI
- Privacy Concerns
- Copyright Considerations
- Enterprise AI Usage

4. Practical Session

Identifying AI mistakes and fact-checking responses.

03

Module 3: Prompt Engineering Fundamentals

 DURATION: 6 HOURS

1. Anatomy of a Great Prompt

- Role
- Context
- Objective
- Constraints
- Output Format

2. Prompting Techniques

- Zero-Shot Prompting
- One-Shot Prompting
- Few-Shot Prompting
- Chain-of-Thought Prompting
- Step-by-Step Reasoning
- Tree-of-Thought Concepts

3. Structured Prompt Design

- Templates
- Frameworks
- Reusable Systems

4. Practical Workshop

Transform weak prompts into professional-grade prompts.

04

Module 4: Advanced Prompt Engineering

 DURATION: 5 HOURS

1. Advanced Strategies

- Persona-Based Prompting
- Expert Role Prompting
- Multi-Agent Prompting
- Self-Critique Prompting
- Reflection Loops

2. Output Optimization

- Structured JSON Outputs
- Reports
- Tables
- Research Documents
- Presentations

3. Prompt Libraries

Building reusable prompt repositories.

4. Practical Workshop

Create enterprise-ready prompt systems.

05

Module 5: Branding, Marketing & Growth

 DURATION: 5 HOURS

1. Startup Branding

- Brand Identity
- Positioning
- Messaging
- Unique Value Proposition

2. Digital Presence

- Website Essentials
- Social Media Strategy
- Personal Branding
- Online Visibility

3. Growth Strategies

- Organic Growth
- Community Building
- Content Marketing
- Viral & Referral Growth

4. AI-Powered Marketing

- AI for Research
- AI Content Creation
- Customer Engagement
- Marketing Automation

5. Practical

Create a startup branding and growth strategy.

06

Module 6: MVP Development & Product Thinking

 DURATION: 5 HOURS

1. Product Development Basics

- MVP (Minimum Viable Product)
- Product-Market Fit
- Iterative Development

2. No-Code & AI Tools Exposure

- | | | |
|----------|-----------|----------|
| • Bolt | • Lovable | • Replit |
| • Cursor | • Canva | • Figma |

3. Building Fast

- Landing Pages
- Prototypes
- Early Product Development
- Rapid Testing

4. Product Thinking

- User-Centric Design
- Problem-Solution Fit
- Continuous Improvement

5. Practical

Build an MVP prototype for a startup idea.

07

Module 7: Startup Operations & Legal Basics

 DURATION: 3 HOURS

1. Team Building

- Co-Founder Selection
- Hiring Early Team Members

2. Business Structures

- Sole Proprietorship
- Partnership
- LLP
- Private Limited Company

3. Intellectual Property

- Trademarks
- Copyright
- Patents (Overview)

4. Financial Basics

- Budgeting
- Cash Flow
- Startup Expenses

5. Practical

Startup structure
selection exercise.

08

Module 8: Funding & Investor Readiness

 DURATION: 4 HOURS

1. Funding Landscape

- Bootstrapping
- Angel Investment
- Venture Capital
- Grants

2. Investor Expectations

- Traction
- Market Size
- Team Strength
- Scalability Potential

3. Pitch Deck Essentials

- Problem
- Solution
- Business Model
- Market Opportunity
- Financials
- Go-To-Market Strategy

4. Practical

Create a startup
pitch deck.

Capstone Project

DURATION:
6 HOURS

STUDENTS WORK IN TEAMS
AND BUILD:

« STARTUP LAUNCH BLUEPRINT »

INCLUDING:

01 Problem Statement

02 Market Research

03 Customer Persona

04 Business Model Canvas

05 Branding Strategy

06 MVP Prototype

07 Go-To-Market Plan

08 Investor Pitch Deck

09 Final Presentation

01

TOOLS COVERED

Industry-leading tools & platforms you will learn and work with during the program.

02

LEARNING OUTCOMES

By the end of this program, you will be able to:

Identify and validate startup opportunities using proven frameworks.

Conduct market and competitor research to reduce risk and make data-driven decisions.

Design sustainable business models and revenue strategies.

Build strong brands and growth strategies using digital marketing and AI tools.

Develop MVPs and prototypes using no-code and AI-powered tools.

Understand startup operations, legal basics, and financial fundamentals.

Create investor-ready pitch decks and present with confidence.

Launch and evaluate startup ideas systematically for real-world impact.

03

CAREER OPPORTUNITIES

High-demand roles you can pursue after mastering Startup & Entrepreneurship.

Startup Founder / Co-Founder

Build and lead your own ventures from idea to scale.

Entrepreneurship Consultant

Guide startups on strategy, growth, and business development.

Business Analyst

Analyze markets, customers, and data to drive decisions.

Growth Marketing Manager

Drive user acquisition, brand growth, and revenue scaling.

Product Manager

Define product strategy, manage roadmaps, and drive innovation.

Venture Analyst / Investor Associate

Evaluate startups, analyze opportunities, and support investment decisions.
